BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING - BS, ACCRA, GH.
Ghana Communication Technology University (GCTU), Jan 2024 - present

DIPLOMA IN SOFTWARE ENGINEERING, ACCRA, GH.
IPMC College of Education, 2022 - 2023

CERTIFICATION IN JAVASCRIPT, ONLINE
Sololearn, April 2023

CERTIFICATION IN REACT (BASIC)ONLINE
HackerRank, June 2023

CERTIFICATION IN REACT (ADVANCED), ONLINE
Coursera, July 2023

EXPERIENCE

SENIOR FRONTEND DEVELOPER, Remote
JustGo Health, 2022 - October 2023

- Architected and developed an intuitive, high-performance web application, leveraging modern frameworks such as React and Next.js, which enhanced user engagement and facilitated a streamlined healthcare management experience.
- Helped design and implement a bespoke dashboard for healthcare providers, enabling efficient management of patient records, schedules, and billing, thereby optimizing operational workflow.
- Innovated a user-centric onboarding process, reducing the average signup time about 50%, which streamlined the integration of new users into the platform.
- Crafted custom components and UI elements aligning with JustGo Health's brand identity, which improved the application's overall user experience and accessibility.
- Fostered a collaborative development environment by working closely with designers and project managers, successfully translating high-fidelity mockups into live, functional user flows that increased user satisfaction rates by 30%.

FRONTEND DEVELOPER, Nigeria
Openwaver Tech LTD, 2021 - 2022

- Orchestrated the frontend development of two high-profile NFT projects, which collectively generated sales of approximately $30k
- Spearheaded the complete overhaul of the company's website within a 1-month timeframe, modernizing the UI/UX and updating the technology stack, which significantly improved site performance and user satisfaction
- Contributed to the integration of RESTful APIs into frontend operations, enabling real-time data synchronization and streamlined user interactions.
- Excelled in a cross-functional team, delivering 6+ customer-centric web applications, which were pivotal in reducing user onboarding time by 40%.

FRONTEND DEVELOPER, Remote
Opensource Contribution and Freelancing, 2020 - 2021

- Actively engaged in notable open source projects, contributing code enhancements and feature developments that have been adopted by a community of thousands of developers.
- Played a pivotal role in the user interface design and development for acclaimed projects such as BioDrop, WhisChat, and Tweetsage, utilizing a variety of modern web technologies.
- Delivered custom, visually captivating, and performance-optimized websites for a diverse clientele as a freelancer, frequently receiving commendations for exceeding client expectations.
- Employed a robust stack comprising HTML, CSS, JavaScript, and advanced frameworks to construct dynamic, interactive websites that prioritize scalability and user-centric design.
